PROFILE

Full-stack developer with solid experience in Vue.js and Laravel. I build responsive web applications and reliable back-end systems. I also bring 3+ years of international client support, which means I communicate clearly and solve problems quickly.

TECHNICAL SKILLS

Frontend: Vue.js, JavaScript, HTML5, CSS3, Tailwind CSS, Sass, Bootstrap

Backend: PHP, Laravel, Symfony

Database & Tools: MySQL, Git, Laragon

Operating Systems: Windows & Linux

Design: Adobe Photoshop, Adobe Illustrator

PROJECTS

Stock Management System Inventory — PHP, HTML, Sass, Chart.js

- Built a multi-tenant MVC inventory platform to track product lifecycles across multiple warehouse locations.
- Designed a Role-Based Access Control (RBAC) system supporting three distinct user tiers: Superadmin, Location Admin, and Magasinier (Warehouse Clerk) — each with tailored data-security scopes.

PROFESSIONAL EXPERIENCE

Customer Support | ADM VALUE Antananarivo, Madagascar · 2022 – Present

- Manage customer interactions across email, live chat, and outbound calls for luxury e-commerce and income support clients.
- Handle complex workflow issues end-to-end, with a focus on speed and clear communication with international clients.
